1   A bit about Logging

1. A log is an append-only, totally-ordered sequence of records ordered by time.

2. A record in log records when and where and what happens.

```java
public class Helloworld{
        public static void main( String[] args ){
                System.out.println( "Hello world" );

                System.out.println( "世界，你好" );
        }
}
```
